A wide range of clients have selected Rangoli IT Solutions Pvt. Ltd. to provide them with the solutions to their varied specific needs. Our client base started in India, but we have expanded to the United States, Saudi Arabia, Australia and Europe. In addition, RITS works with a variety of clients right from individual professional to corporate entities, non-profit organizations and public institutions. We, Rangoli IT Solutions Pvt. Ltd. have become exclusive service providers for several government research institutions and is working as technical partner to many export houses.

we very well realise and accept, what we are today is due to the support and acceptance of our society and surrounding. RITS sincerely believes in giving back so we are proud to participate in various philanthropic efforts round the world, thus support several reputed NGOs, trusts and other organizations involved in such activities.

# Our Expert Strategies

## IT Strategy Development

You are starting a new setup, but in today's world, be it any type of business a smartly designed IT setup is very essential from the very first day to manage and keep the track of your business. So, here we RITS (Rangoli IT Solutions Pvt. Ltd.) enter to assist you to chalk out a tight IT setup with best result oriented approach and in-budget expense for your organization.

## IT Performance Improvement

Valuable newer technologies and approaches continue to emerge day by day but most of organizations already have a legacy software and thus continue with the outdated applications which prevent them from adopting new technologies. Therefore, a need for advanced IT planning is becoming a necessity in this new emerging world of technology to provide complete focus on 100% progress and successful approach. Never resist change; it's a transformational phase towards better results.

## IT tool & application development as per clients need for enhanced output

Sometimes the standard applications available in the market are not capable enough to serve its purpose up to the mark, and many times we do not realize that this little misfit which we ignore due to "Let it go" tendency in human nature could cause a great loss. Here comes the importance of customized application and processing tools. This is a tailored made solution for you, which fit in your work process exactly as per your requirement.

## Web Presence (Development and SEO):

The new world of web has opened lots of new avenues for every business as well as opened doors to many new business ideas based on concepts like E-commerce and E-services etc. RITS has full expertise to develop the backbone and give you complete projection in this new world. You just have to hold our hands and we would be there guiding you towards the peak of your dream success.

There is always a better strategy than the one you have; you just haven't thought of it yet.

Sir Brian Pitman

A satisfied customer is the best business strategy of all.

Michael LeBoeuf

It's not the customer's job to know what they want

Steve Jobs

**IT Consultancy and setup creation:** This covers broadly three different areas needing a Tight **IT** effect to get maximum output in any business organization.

**IT Management and Support:** We help you to plan and structure the required IT setup and once it's done we can provide the maintenance services.

**IT Procurement:** Procurement of right **IT** stuff can be a challenge and correct advice can help you out to crack a cost effective deal.

**Cyber Security:** As more and more people have switched to manage and automate their business with the help of **IT** a new issue of protection of computer based equipment, information and services from unauthorized access, manipulations and destructions has come up as an important field. We provide our services to make your **IT** structure foolproof and secure.

### Domain Registration and Management

We at RITS can acclaim to offer our client best price and services for domain booking, transfers and renewals. We offer you world's latest TLDs and managed services so that you do not miss your domain name which becomes your identity in the world of internet.

### Hosting services

We provide Windows, **Linux**, **Cloud**, **VPS**, **Dedicated** and **Managed Hosting Services** to our clients. Our USP is reliability, security, good bandwidth, negligible down time and 24X7 Customer support cell for instant remedies to our clients.

# Our Main Services

## Website Design and Development:

We build web applications as per the clients need right from a simple static informational website to major role based interactive model in the form of forums, blog, web-based MIS applications, small data processing modules etc.

## Online E-com Application development and maintenance:

E commerce could be taken as a sector that is complete in itself. We provide complete development and support for this; It starts with the development of a shopping interface and end up where the final payment is accepted by the company for selling its products. The complete process is divided in many modules and facilities categorized as essential as well as add-ons.

## Maintenance contracts for websites, SEO and Desktop applications:

Apart from developing completely new application and provide complete support service under an AMC agreement we also provide our support and services for the applications either online or offline or make some required changes or provide some Add-ons and optimize the already running applications.

## Managed Servers : Setup, Security, Monitoring & Support - Fully Managed

Our Managed Server managed by full-time system administrators. A managed Server allows for not only more productivity, but eases your mind about a multitude of other issues. **MDS** differ from Dedicated Server or unmanaged dedicated servers as the owners are not expected to be the full-time system administrators.

## VPS Hosting: Gives You as like as Dedicated Functionality

Seamlessly Scale Resources. Set up your Server in Minutes. **VPS Hosting** is the perfect choice for those who wish to start small but have the ability to scale up very quickly. Your package resides in its own "virtual machine" that is functionally equivalent to a private dedicated server at a fraction of the cost.

## Backup Again & Again: Backup, Monitor, & Undo Changes,

Restore your Website from any Point. can download a zip of the contents at any time, choose an automatic restore, or restore individual files and folders. Backups are stored on Amazon Web Services Simple Storage System, known as S3. S3 boasts object durability levels of 99.999999999%, achieved by storing redundant copies of data across multiple geographies and facilities

## Offline Customized Application Development:

These are the applications developed to be used as an help in process and system management in any business. They can be developed to be run on a single standalone system to an ERP application that manages big process on network or intranet.

## SEO/SMO:

Once we get a website/ web application ready the priority concern becomes to increase the visibility and no. of hits on the website. So, the role of SEO and SMO is to enhance your presence and popularity on internet. It is a strategic planning with different combinations and probable calculation of a mixture of process and social media involvement resulting in top placing of the website in all the popular search engines and making the website able to attract good traffic. This is the key to make any business or concept hit in the world of internet.

## BPO Services:

RITS owns a very well equipped and fully functional separate unit for catering the BPO both voice and non-voice processes. We focus on best quality and 100% accuracy in any process that we undertake. Our BPO unit has almost three years experience in processing many govt./ non govt. processes.

## Dedicated Servers: Powerful, Scalable & Redundant with Complete Root Access

Our Dedicated Servers feature super-fast processing with full root access, all of which is backed by the best support teams in the industry. Now, you don't need to worry about setup or configuration. We handle everything. Customise your server the way you want it. Upgrade it for more storage & backup options. control panel systems and much more.

## Web Security: Secure Your Website Now from Viruses, Hackers, Identity Theft & SEO Blacklists.

Our Solution scans your website to find and fix any existing **malware / vulnerabilities** and then uses it's protective TrueShield firewall to keep harmful traffic away for good, while TrueSpeed technology speeds up your website and gives your SEO a boost.

## Enterprise Email: A Robust Business Email Solution Designed for any Business.

Now get 25GB Email Storage + 5GB File Storage in our all new enterprise level offering that is built around NetApp's FAS3240, a shared storage device with a 99.999% uptime. and always available. Let your customers connect with their device's default app on Symbian, iPhone, Android or Windows. Give them the privilege to access their collaborative business mailbox on the go.

# Our Main Areas of Activities

We at RITS (Rangoli IT Solutions Pvt. Ltd.) very much believe in the power of Information Technology and thus we know that Strategic IT Planning is very much essential for a company that focuses in growth and success.

We partner the ambition of our clients by heart, while the client companies are busy in excelling their core competency WE KEEP THEIR IT TIGHT, thus enhancing their capacity through managed and required IT Solutions.

## IT tools and application development as per clients need for enhanced output:

**Quality is never an accident;** it is always the result of high intention, sincere effort, intelligent direction and skillful execution; it represents the wise choice of many alternatives"  
- William A. Foster

## Our Quality Products

**A**fter years of rigorous research and analysis of the requirement based on the nature of trade we have developed few standard applications listed below. But again the USP of these applications is that it is quite flexible to fit in the already running system.

### **School-Tech:** ERP Solutions...

School-Tech is a complete ERP solution developed by Rangoli IT Solutions Pvt. Ltd. to automate and manage the functioning of any type of educational institution. School-Tech application stores, process and shares your data with a great ease and speed within the organization. Its functioning starts right from the admission procedures leading to cover important departments like fees and accounts of students, accounts of staff, daily schedule designing, paper setting, results, library management, hostel, stock, etc. covering almost all the working departments and sectors of an institution.

### **QURX:** ERP Solutions...

A product created by Rangoli IT Solutions Pvt. Ltd. is an Integrated Health Information System, which addresses the critical requirements of hospitals. QURX enhances the efficiency to streamline the day to day operations, enhances administration and control, and improves response and patient management. QURX maintains all hospital record on computers no matter whether it is prescription of doctor or treatment sheet of patient, medicine, employees, pharmacy, pathology etc., thus helping in easy information access and no delay in waiting for physical reports and data.

### **Cablegram:** Cloud Based Application...

A virtual office to manage Cable Network Customers through RITS's DTH operator administrative tools. A high end product to rely on for managing the issues like set top box installation and maintenance, preference packages, billing, payment dues and client support.
